

Air1 is a such positive influence to me and so many other people where I live. We always have it playing in our bathroom and so many others do too. It's always on in my car as well. It really makes me happy to listen to good, clean music. It also makes me happy to always hear worship as well. I know that if Air1 was taken off of the air, I would be devastated and I know that many others would be too. There wouldn't be the uplifting music to brighten our day or to help us to know that God is here and He cares so much for us. There would be nothing else to listen to because so many stations and DJ's are so dirty and full of bad language and sexual immorality. Families around the nation would like to have clean, good music to listen to. Most parents I know don't want their children picking up dirty words from the music they listen to. Air1 provides the opportunity for young kids to be listening to this music that has a modern beat, but clean, wholesome words and implications. This is why I believe Air1 needs to stay on the radio. Thank you.

Sincerely,
Amy Smith
